BATTLESCRAP · THREE FIRES

SETUP

15 PP; choose exactly 3 heroes from your five and take 3 free recruits. Concord: Kalawi, Hester, Voru, Tavi, Demea. Wildmoon: Niala, Perrin, Ketu, Ilex, Orro. Secretly choose north/south and bid PP. If choices match, higher bid wins choice and first turn; opponent gains the bid as PP. Tied bids increase secretly. Different choices: random first player. North deploys in blue hexes; south in stone hexes. No partial-hex deployment or respawn. Shuffle 4 traps and 5 Brightstone face down onto the 9 Xs, then reveal. Each side: 24 tactics, draw 4 (limit 8); draw 1 objective (limit 2).

ACTIVATE

Start-turn scoring first. Choose any friendly hero, including slot 0; take that slot's AP/RAP, move its portrait to slot 0 and shift intervening portraits. Resolve poison on heroes newly reaching slot 5 and on the active hero. Spend AP on that hero or friendly recruits; RAP only on recruits. Each hero action separately costs 1/2/3… AP per use: Move, Attack, Grab, Respawn. Each recruit instead has ONE shared increasing cost across all actions. Unspent points expire.

ABILITIES & MOVEMENT

Discard the printed matching element to use an ability during that hero's activation; pay printed AP too. Card-only abilities stay card-only on repeats; paid abilities increase AP by 1 per repeat. Move up to Move; do not cross occupied or impassable hexes. Push steps increase distance from source; Pull steps decrease it. Stop when blocked. Any movement into a trap: 1 damage, remove trap. Any movement into fire, or ending a unit's activation there: 1 damage. Nothing blocks line of sight.

COMBAT

Roll Attack versus Defense D6s. Highest die wins; if both show 6 compare number of sixes; remaining ties favor attacker. Hit: 1 damage; two extra attacker sixes: +1 damage. Two extra defender sixes: gain 1 Fortified after cleanup. Final pool minimum 0: at 0 roll two dice and keep only the lower. Before rolling, alternate tactic/pass until both pass. Discard for printed +2 Attack/Defense OR +1 Attack/Defense/damage. Any element; cards stack. Damage bonuses require a hit.

QUEUE SETUP & PREPARATION

Low bidder takes highest slot 5, then alternate owners down: low 5/3/1, high 4/2/0. Randomly deal each side's three portraits into its slots. Equal bids with different zones: second player takes slot 5. Buy before drawing: extra recruit 3 PP; group Boots 2 (+1 Move), Shields 3 (+1 Defense), Weapons 3 (+1 Attack), each once; extra starting tactic 1 PP (hand limit 8). One equipment per hero and one copy per army; retained on respawn. Ordinary unspent PP expires; only unused bid compensation remains for rerolls. If deployment is full, use a nearest reachable empty FULL hex. Ability-granted recruit Moves count toward that recruit's action count; Pull/Push do not.

RANGE & FLANKING

Melee: +1 Attack per OTHER ally adjacent to target with no other adjacent enemy. Ranged: no flanking; -1 Attack if engaged; ordinary extended range up to double at -1 Attack. EXACTLY 2 means distance 2 only. Heavy attack: halve Attack dice, round up; +1 damage on hit, gain 1 Dazed on miss. Only unused bid compensation funds attacker rerolls: 1 PP per die.

DAMAGE & STATUS

Red cube = 1 damage; damage reaching HP defeats. Hero defeat: owner draws 1 tactic; drop 1 Brightstone; move portrait to slot 0. Recruits do neither reward. Respawn returns one model fully healed/status-free in deployment zone. Enraged: +1 hit damage per token on next attack; spend ALL even on miss. Fortified: +1 Defense per token; Dazed: -1 Defense per token; spend BOTH entire stacks after defense. Newly gained tokens survive cleanup.

POISON

Each application adds Poison and swaps the hero one queue slot toward 0, stopping there. Poison deals damage per token at activation start and each new arrival at slot 5; tokens remain. Poison immediately defeats recruits. Healing a poisoned unit removes ALL poison instead of healing any damage.

REWARDS & WINNING

Grab collects a stone under the unit; friendly units also collect at turn end. Each stone: draw 1 tactic; 2 RP after battle. Control fire by having MORE adjacent units than opponent; tie = neither. North scores 1 VP at turn start unless south controls 2 fires; south scores 1 if it controls 2. Enemy defeat: 1 VP. First to 8 VP wins immediately. At turn end claim at most 1 eligible objective, gaining 1 VP + 1 tactic; then draw an objective if none held. New objectives become eligible next own turn. Objective deck never refills; tactics reshuffle discards.

TOKEN / ICON LEGEND

Heart: HP. Arrow: Move. Red sword: Attack. Green bow: ranged Attack. Blue shield: Defense. Attack 4 (3) means 4 dice, range 3. Flame / drop / bolt: Fire / Water / Lightning payment. Star = Enraged; shield = Fortified; minus = Dazed; P = Poison. Crystal = Brightstone; T = trap. Maroon sun = Concord; blue antler-moon = Wildmoon. Ownership holders have NO elements. Starter heroes have no regional ability.
